FOREWORD

Accelerating the promise of Cairo

Women have a right to make their own decisions about whether, when or how often to become pregnant. That right was reaffirmed in 1994 in Cairo at the landmark International Conference on Population and Development (ICPD), where 179 governments also agreed that sexual and reproductive health is the foundation for economic and social development.

I remember being in Cairo for that conference. I remember the excitement, the sense of purpose and of being witness to something truly extraordinary—countries from all regions of the world committing to enabling people to make informed choices about their sexual and reproductive health as a matter of fundamental human rights and as a foundation for individual and collective well-being.

The ICPD's Programme of Action promoted a vision of integrated development that foreshadowed the United Nations 2030 Agenda for Sustainable Development and emphasized the same principles that underpin today's Sustainable Development Goals: non-discrimination and universality; the centrality of health, education and women's empowerment to sustainable development; and the collective need to ensure environmental sustainability.

Since 1994, governments, activists, civil society organizations and institutions such as UNFPA have rallied behind the Programme of Action and pledged to tear down barriers that have stood between women and girls and their rights and choices. Despite the remarkable gains made since 1994, we still have a long way to go before we can claim to have lived up to the promises we made in Cairo. Too many women and girls are not yet enjoying their rights.

© UN Photo

This is what the world would look like if it had realized the vision of Cairo:

The more than 800 women who die every day in pregnancy or giving birth would survive.

The 214 million women who want to prevent pregnancy would have access to modern contraception.

The one in three women who are subjected to physical or sexual violence in their lifetime would live in safety, with respect and dignity. The 200 million girls and women who have been subjected to female genital mutilation would never have been harmed, and the 33,000 girls who are forced to marry every day would be deciding for themselves as adults whether or when to enter into a relationship.

In 2018, we at UNFPA set in motion a strategic effort, based on quality data, to achieve three zeros by 2030: zero unmet need for contraception; zero preventable maternal deaths; and zero gender-based violence and harmful practices, such as child marriage and female genital mutilation.

Our ambition looks towards 2030 because that is when the Sustainable Development Goals are to be achieved. Success towards these goals depends on success in empowering all women and girls to enjoy their rights and to have real choices in all aspects of their lives.

We began reorienting our programmes around the world in 2018, in keeping with the focus on making

contraception accessible to women and young people, enabling women to have healthy pregnancies and safe births, and protecting women and girls from harm. Because these efforts must be based on quality data, we also strengthened our capacities for data analysis and dissemination to help governments formulate policies that close gaps in services, particularly for those who have been left behind. This report shows the impact our programmes have had on the lives of women and girls in 155 countries and territories in 2018.

UNFPA cannot, however, achieve these three zeros on our own. Governments, civil society, and individuals must all be part of the movement. They will have an opportunity to join the next leg of the journey towards rights and choices for all at the Nairobi Summit on ICPD25 in Kenya in November of this year. The Governments of Kenya and Denmark, co-conveners together with UNFPA, will call on all donors, all countries, all civil society organizations, all community and youth leaders, all parliamentarians, all international financial institutions and the private sector to recommit to the principles and objectives of the Programme of Action—to make our three zeros everyone's three zeros, and to complete the unfinished business of Cairo.

Universality is a guiding principle of the ICPD Programme of Action: everyone has a right to sexual and reproductive health, regardless of where they live, their income level or their circumstances—even if they are displaced by conflict or disaster. Last year, UNFPA and its partners

TOWARDS

ZERO

unmet need for family planning

reached an estimated 18 million people in over 55 countries with humanitarian assistance. This included the implementation and coordination of the minimum initial service package for reproductive health to ensure that women and girls affected by humanitarian crisis have their needs addressed in line with humanitarian and human rights principles and priorities.

UNFPA continued to strengthen our capacity to respond quickly in emergencies. We established a Humanitarian Response Office and will aim to have it fully staffed in mid-2019. We also established a new Humanitarian Action Thematic Fund to streamline donor support for our life-saving programmes.

UNFPA in 2018 continued to prioritize innovation to create and scale up data-driven, sustainable, open solutions to bring about transformative change for women, adolescents and youth. For example, we launched a Population Data Platform, which allows planners to identify and map where needs are greatest and where interventions need to focus to reach those furthest behind. By allowing for combining different sources of data, such as census and surveys, the Population Data Platform can help highlight, for example, which districts in a country have the highest rates of child marriage, or where demand for contraceptives outstrips supply.

Innovation is also contributing to UNFPA efforts to renew itself and to strengthen our relationships with United Nations partner agencies so that we all deliver more

and deliver better for women and girls in developing countries. In support of reform of the United Nations development system and to best equip UNFPA to deliver on its strategic plan, we made strides in our comprehensive change process. This will ensure that we have the organizational culture, structure, systems and skills necessary to achieve our three zeros and help realize the 2030 Agenda for Sustainable Development.

In this year, our 50th, as we look back on 2018, we echo the words of Dr. Nafis Sadik. Describing the path to sustainable development, she said:

“People are at the heart of the process, as agents and as beneficiaries. We have it in our power to lighten their burdens, remove obstacles in their path and permit them the full flowering of their potential as human beings. That is the moral and ethical basis of the ICPD.”

People-centred sustainable development remains the moral and ethical cornerstone of our work to ensure rights and choices for all. We at UNFPA will do our utmost to finish the unfinished business of ICPD and thereby fulfill the promise of sexual and reproductive health and rights for everyone, everywhere.

Dr. Natalia Kanem
Under-Secretary-General and Executive Director
UNFPA, the United Nations Population Fund

ZERO

preventable maternal deaths

ZERO

gender-based violence and harmful practices

Towards **ZERO** unmet need for family planning

The unmet need for family planning has dropped by about half since 1969, the year UNFPA was established. At the same time in developing countries, the share of married women using a modern method of contraception since that time has nearly tripled, to about 57 per cent.

To achieve zero unmet need for family planning by 2030, governments will have to accelerate actions to expand access to all.

In 2018, UNFPA continued making the full range of quality contraceptives and services accessible, enabling millions of women to make their own decisions about whether, when or how often to become pregnant. To support countries' family planning initiatives, UNFPA procured the equivalent of a year's worth of contraception for about 68 million couples in developing countries.

UNMET NEED FOR FAMILY PLANNING

(women, ages 15-49, married or in a union)

● Actual ● Projection (if current trends continue) ● UNFPA vision

Towards **ZERO** preventable maternal deaths

While progress towards reducing the maternal mortality ratio in developing countries continued in 2018, it is not at the rate required to achieve the UNFPA goal of zero preventable maternal deaths by 2030. To reach that goal, developing countries must accelerate their annual rates of reduction by at least 7.5 per cent.

UNFPA is helping lower the number of preventable maternal deaths through programmes that reduce inequities in access to quality sexual, reproductive, maternal and newborn health care, ensuring universal health coverage that includes sexual and reproductive health care, and strengthening health systems.

MATERNAL MORTALITY

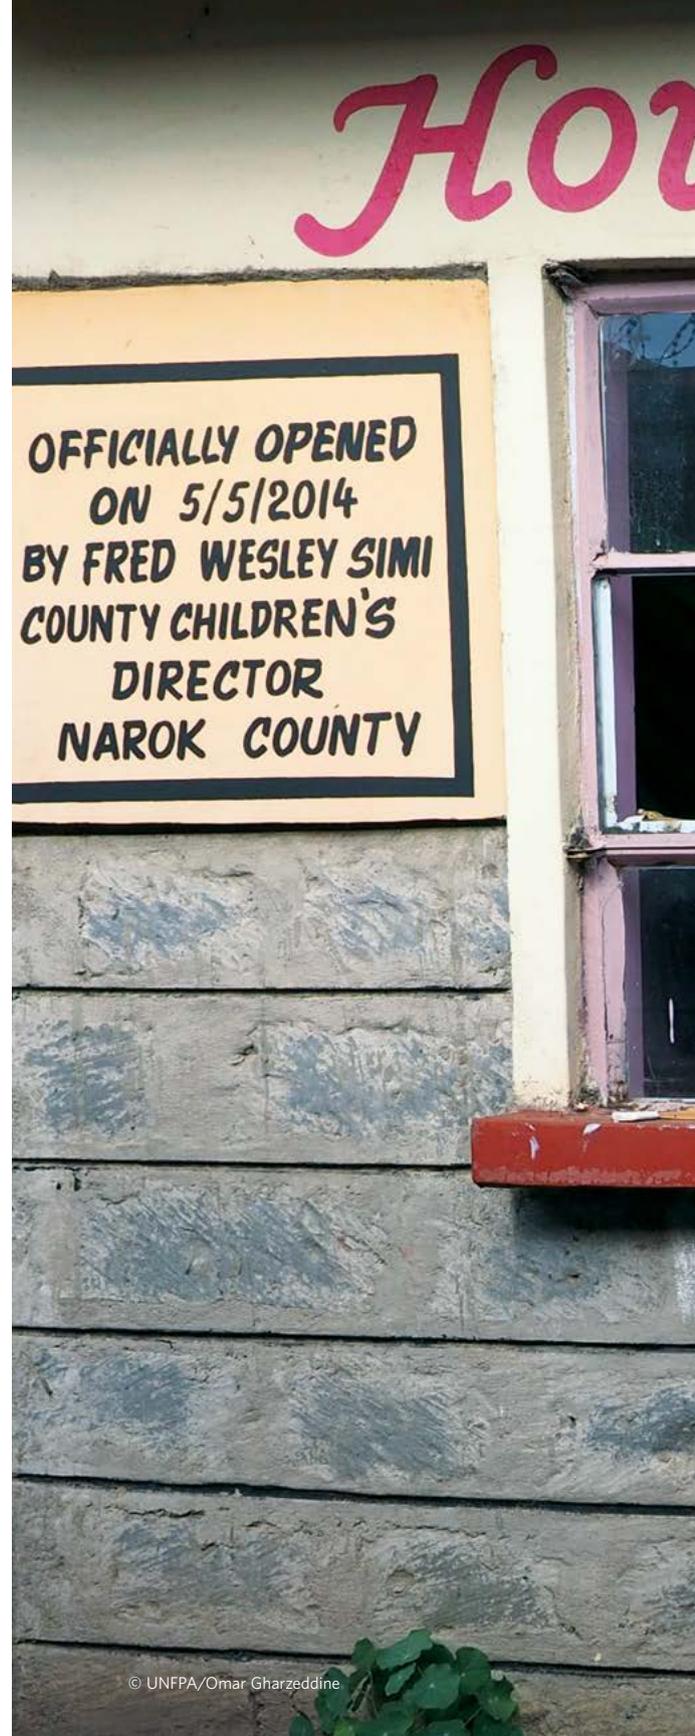

Towards **ZERO** gender-based violence and harmful practices

About one in three women worldwide will have experienced physical or sexual violence at some point in her lifetime. And, every day, tens of thousands of girls are subjected to the harmful practices of female genital mutilation and child marriage.

The rate of female genital mutilation has declined over the past three decades. But to achieve the 2030 target of ending this harmful practice, the rate of reduction must accelerate thirteen-fold over the current rate.

The rate of child marriage has also declined, but to meet the 2030 target, progress must be 12 times faster than the rate of the past decade.

House of Hope

OUR MISSION STATEMENT

TO GIVE EVERY GIRL ESCAPING FGM AND FORCED EARLY MARRIAGE AN EQUAL OPPORTUNITY TO PURSUE THEIR GOALS IN LIFE NOT TO BE EQUAL BUT TO BE DIFFERENT, TO REALISE THEIR UNIQUE AND GOD GIVEN POTENTIAL.

OUR VISION

TO HAVE A SOCIETY THAT EMBRACES EQUAL OPPORTUNITIES FOR BOTH BOYS AND GIRLS, THAT IS FREE FROM FEMALE GENITAL MUTILATION AND FORCED EARLY MARRIAGE.

OUR AIMS

- ~ TO GIVE A SAFE HOME FOR GIRLS ESCAPING FGM & FORCED EARLY MARRIAGE.
- ~ TO SUPPORT GIRLS AT THE SAFEHOUSE TO CONTINUE WITH THEIR EDUCATION OR VOCATIONAL TRAINING.
- ~ TO RECONCILE GIRLS AT THE SAFEHOUSE WITH THEIR PARENTS/GUARDIANS.
- ~ TO EDUCATE THE SOCIETY ON THE ILL OF F.G.M & FORCED EARLY MARRIAGE.

Girls who received services related to child, early and forced marriage	800,148
Girls and women who received services related to female genital mutilation	298,391

AFRICA, EAST AND SOUTHERN

Of the 85,000 preventable maternal deaths in East and Southern Africa every year, about one quarter are among adolescents and more than half take place in humanitarian settings. UNFPA in 2018 helped reduce preventable maternal deaths in the region through greater access to emergency obstetric care; antenatal, safe-delivery and postnatal care; and modern contraception. Actions included training midwives in 16 countries to provide high-quality, integrated, reproductive, maternal, neonatal, child and adolescent health care. Actions also included collection and analysis of maternal mortality data to identify—and fill—gaps in services.

UNFPA aimed to reduce the unmet demand for family planning, especially among young people and marginalized populations, by improving the quality and reliability of services and by offering a range of contraceptive options.

UNFPA programmes in 2018 advanced gender equality and women's empowerment and addressed the physical and psychological impact of gender-based violence.

AFRICA, WEST AND CENTRAL

UNFPA scaled up services to help girls in West and Central Africa make a safe and healthy transition from adolescence to adulthood. Through a Sahel Women's Empowerment and Demographic Dividend, or SWEDD, project, UNFPA expanded safe spaces for girls who are not in school and at risk of the harmful practice of child marriage. A demographic dividend is the additional potential for economic growth that can result from shifts in a population's age structure when the share of the working-age population expands relative to the non-working-age population.

Also as part of the SWEDD project, UNFPA supported a new programme to train midwives and nurses with the aim of reducing preventable maternal deaths. Three new Centres of Excellence for the Masters in Nursing and Obstetrics were established in Côte d'Ivoire, Mali and Niger.

UNFPA, through the Ouagadougou Partnership to end unmet need for family planning in nine West African countries, helped 1.4 million women gain access to modern contraception between 2016 and 2018.

ARAB STATES

Nine Arab States are responding to humanitarian emergencies, including in Yemen, Syria and Iraq. To save women's lives in the region's humanitarian settings, UNFPA supported 131 mobile clinics and 152 emergency obstetric care facilities.

To address gender-based violence in humanitarian settings, UNFPA supported 162 facilities that provided clinical management of rape and 242 safe spaces that provided protection, information and support to survivors.

UNFPA also supported 236 communities in the region in their abandonment of female genital mutilation.

In an effort to reduce the unmet need for family planning, UNFPA expanded the coverage of high-quality, reliable and stigma-free services across the region.

ASIA AND THE PACIFIC

UNFPA in Asia and the Pacific stepped up efforts in 2018 to end unmet need for family planning, preventable maternal deaths and gender-based violence and harmful practices against women and girls.

UNFPA strengthened programmes to reduce preventable maternal death in countries with higher maternal mortality ratios, contributing to reaching targets under the Sustainable Development Goals by 2030. These countries are Afghanistan, Bangladesh, Cambodia, Lao People's Democratic Republic, Myanmar, Nepal, Pakistan, Papua New Guinea and Timor-Leste.

To help meet the goal of ending unmet need for family planning, UNFPA advocated for increased investments in contraceptives and for programmes that enhance reproductive rights in lower-income countries, such as Cambodia and the Lao People's Democratic Republic.

Under the multi-year "kNOwVAWdata" initiative, UNFPA supported the collection, analysis and communication of data about the prevalence of violence against women in the region and created a curriculum to train enumerators in carrying out surveys that protect women's privacy. In addition, UNFPA increased support for programmes to end the harmful practice of child marriage in South Asia.

EASTERN EUROPE AND CENTRAL ASIA

In Eastern Europe and Central Asia, UNFPA helped countries make progress towards reaching zero unmet need for family planning and zero preventable maternal deaths. But emphasis was placed on ending gender-based violence, which prevents women and girls from enjoying their rights, including reproductive rights.

In 2018, UNFPA joined an initiative led by the Organisation for Security and Co-operation in Europe to generate, for the first time in the region, comparable data on violence against women and girls. The survey revealed that 70 per cent of women had been subjected to some form of violence, and one in three had experienced physical or sexual violence.

UNFPA stepped up efforts to assist the countries of the region in establishing systems that bring together health care, law enforcement and criminal justice to support survivors, and to strengthen services in humanitarian settings. UNFPA also worked across the region to help prevent violence through programmes that raised awareness and promoted behaviour change.

UNFPA also helped engage men and boys in preventing violence, but also more broadly in achieving gender equality, through programmes such as the “Let’s Talk!” campaign, which challenges taboos around women’s health, and through gender-sensitive policies that allow both parents to have careers and share household and care responsibilities.

LATIN AMERICA AND THE CARIBBEAN

Maternal and neonatal mortality rates have decreased in Latin America and the Caribbean but access to quality care is still out of reach for many pregnant women. In response, UNFPA supported evidence-based interventions that improved the quality of maternal health care, especially in the prevention and management of obstetric complications and emergencies. UNFPA also helped strengthen midwifery training programmes.

UNFPA supported the region's efforts to end unmet need for family planning by increasing supplies of contraceptives and bolstering capacities to procure and manage supplies of contraceptives and monitor quality. UNFPA also supported the introduction of subdermal implants in four countries.

In collaboration with national stakeholders and partner organizations, UNFPA helped improve coordination of services for survivors of gender-based violence among the health and criminal justice sectors.

PARTNERSHIPS

© Shakhtar Social

Football Club Shakhtar

The partnership between UNFPA and Football Club Shakhtar promoted responsible fatherhood and raised awareness about gender inequality in Ukraine in 2018. Through a Four Hands Happiness awareness-raising campaign, football players reached more than 1.5 million people with messages about the importance of men and women sharing responsibility for household and care work. Also, as a result of this partnership in 2018, Football Club Shakhtar established a female football team that challenged stereotypes about gender in sports.

© UNFPA

Individual Giving

In 2018, UNFPA piloted the online individual-giving programme, which enabled members of the general public from 41 countries to make donations to UNFPA emergency maternal-health services in Yemen and for Rohingya refugees in Bangladesh.

© Tremeau, Mbour, 2018

Nutrition International

UNFPA and Nutrition International partnered to integrate nutrition into UNFPA-supported sexual and reproductive health programmes in Nigeria and Senegal. This initiative promotes healthy eating and iron and folic acid supplements during pregnancy to prevent anaemia. The partnership, which is expected to benefit up to 500,000 women and adolescents of reproductive age by the end of 2019, is supported by Canada's Nutrition Leverage and Influence for Transformation programme.

© EPF

Parliamentarians

Partnerships with parliamentarians have helped build support for the International Conference on Population and Development's Programme of Action and the Sustainable Development Goals. In 2018, more than 100 parliamentarians from 70 countries adopted the Ottawa Statement of Commitment, pledging to mobilize their constituencies and governments to make bold efforts to fully implement all aspects of the Programme of Action by 2030.

© UNFPA

Royal Philips

The global partnership with Royal Philips aims to expand access to quality, affordable health care, including maternal and reproductive health services, for women and girls in marginalized communities. Through the partnership, Royal Philips will help introduce technologies and innovations that can extend the reach of health systems, lower costs and transform maternal health services for 50 million women and girls by 2025. The partnership is being launched in Republic of the Congo with the Ministry of Health and Population.

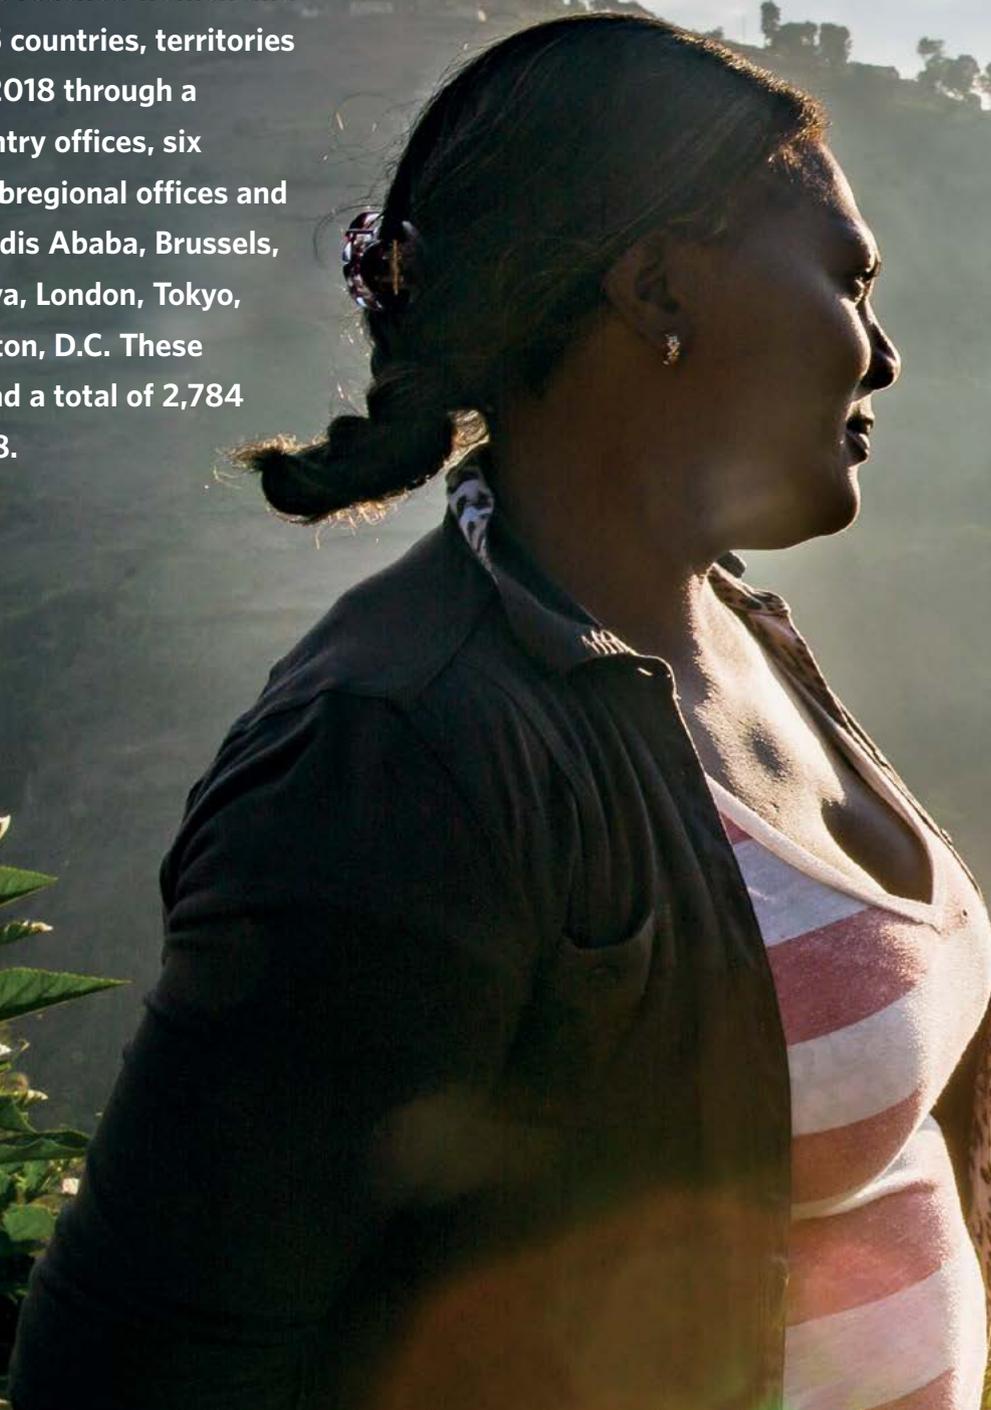

© UNFPA

University of Bristol

The partnership with the University of Bristol is enabling UNFPA to collaborate on research to support UNFPA policies and programming aimed ending preventable maternal death, unmet demand for family planning and gender-based violence. The University of Bristol is a founding member of UNFPA's global university network, TransformU, and hosted the United Kingdom's first youth dialogue in 2018 on the unfinished business of the Programme of Action of the International Conference on Population and Development.

UNFPA programmes reached women and young people in 155 countries, territories and other areas in 2018 through a network of 136 country offices, six regional and two subregional offices and liaison offices in Addis Ababa, Brussels, Copenhagen, Geneva, London, Tokyo, Seoul and Washington, D.C. These offices combined had a total of 2,784 regular staff in 2018.
