

# GREEN PROCUREMENT

Reducing Environmental Impact

UNFPA is seeking to improve the environmental sustainability of all aspects of its procurement activities.

The Green Procurement Strategy advocates reduced environmental impact through initiating supplier dialogue and establishing sustainability standards.

The reported numbers account for UNFPA Procurement Services Branch male condom activities in 2016

3,600 tonnes of non-emitted CO<sub>2</sub>e\*

\*As in carbon dioxide equivalent; the global warming potential of various greenhouse gases stated in CO<sub>2</sub>

1500 tonnes of annual solid waste reduction

12,750,000 kWh of electricity saved in 2016

All male condom manufacturers hold the

# ISO 14001

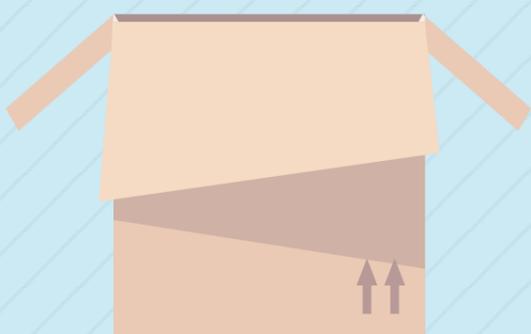

certification

1.8 million m<sup>3</sup> of water treated

210 thousand m<sup>3</sup> of water saved

The condoms are packed in FSC certified\* cardboard boxes

\*FSC certified or equivalent

Recycled post-consumer materials

# 52%

in outer boxes and shipping materials
